Half Year Chairman's Report	2
Statement of Financial Performance (Unaudited)	
Statement of Financial Position (Unaudited)	5
Statement of Cash Flows (Unaudited)	6

#### Half Year Chairman's Report

The first half of the financial year produced a satisfactory result despite operating in the wake of Covid-19 disruptions. Total sales of \$3.68m were generated which was well above budget, but significantly below the previous year's \$5.65m of sales. Last year's sales were boosted by strong demand for bait products to tackle rodent irruptions generated by beech tree masting.

Covid-19 has not significantly affected our performance to date. During the 'lockdown' periods earlier in 2020, Orillion operated as an essential service, and this was followed by a period of strong sales in all market sectors. We were able to meet demand thanks to the efforts made by our dedicated team of manufacturing staff often working overtime. Several predator control operations utilising Orillion bait were deferred by our customers for a range of reasons in the first half of the financial year, however we are hopeful that they will be undertaken during 2021. We remain concerned that a new entrant to 1080 bait manufacture lacks focus on health and safety and bait quality, risking the 'social license to operate' for this essential predator control tool.

Our collaborative work with others continued strongly in the first half of the year. We were very pleased to see the ongoing success of ZIP (Zero Invasive Predators) in their eradication efforts on the West Coast of the South Island utilising Orillion bait and bird repellent products. We continue to develop new products with ZIP.

The collaborative work with Manaaki Whenua Landcare Research to develop rat selective toxin products continues. Much of this involves international input, which was slowed to some extent by Covid-19. Bait development, field trials and formulation work continue. Other emerging product and market development projects were also undertaken during the first half of the year, although this is a necessarily a long and meticulous process when developing toxic bait products.

Our network of international collaborators continues to grow founded on existing business projects, but this is now opening doors to new export opportunities which is important as we continue to diversify our business. Orillion bait products are also routinely used for island eradication projects mainly in the Southern Hemisphere.

Health and Safety remains an ongoing and major focus for Orillion. New processing equipment was commissioned during the period and we continue to investigate opportunities to further enhance worker safety.

We commenced measuring our greenhouse gas emissions in the previous financial year, and we now analyse these on a monthly basis. The emissions for the first six months of the year were 71 tonnes of carbon, compared to 101 tonnes in the same period the previous year. (Note that any direct comparison needs to take different production levels and product mix into account.)

The first half of the financial year produced a satisfactory result despite operating in the wake of Covid-19 disruptions. Total sales of \$3.68m were generated which was well above budget, but significantly below the previous year's \$5.65m of sales. Last year's sales were boosted by strong demand for bait products to tackle rodent irruptions generated by beech tree masting.

Covid-19 has not significantly affected our performance to date. Bait development, field trials and formulation work continue. Other emerging product and market development projects were also undertaken during the first half of the year, although this is a necessarily a long and meticulous process when developing toxic bait products.

Our network of international collaborators continues to grow founded on existing business projects, but this is now opening doors to new export opportunities which is important as we continue to diversify our business. Orillion bait products are also routinely used for island eradication projects mainly in the Southern Hemisphere.

Health and Safety remains an ongoing and major focus for Orillion. New processing equipment was commissioned during the period and we continue to investigate opportunities to further enhance worker safety.

We commenced measuring our greenhouse gas emissions in the previous financial year, and we now analyse these on a monthly basis. The emissions for the first six months of the year were 71 tonnes of carbon, compared to 101 tonnes in the same period the previous year. (Note that any direct comparison needs to take different production levels and product mix into account.)

#### Financial Performance

As noted above, sales for the period were well ahead of budget at \$3.675m, and this together with tight monitoring and control of overhead costs, resulted in a net profit of \$565,000k against a budget of \$32,000k. Overhead costs include the Chief Executive's remuneration for the six month period of \$141,000.

Cash equivalents and short term investments are higher than budget due to the better than expected profit in 2020 and the better than budgeted profit year to date. Stock levels remain at reduced levels, orders have been placed for raw material purchases of approximately \$700,000 for future delivery.

T. Murdoch - Chairman
